AI/ML Student  
Pune, India

## PROFILE

Final-year B.Tech student in **Artificial Intelligence and Machine Learning** with hands-on experience in Python, machine learning, deep learning, computer vision, and generative AI. Experienced in building practical AI applications, processing real-world data, and integrating machine learning models with software systems.

## EDUCATION

|                                                                                                                          |                                         |
|--------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|
| <b>Symbiosis Institute of Technology</b><br><i>B.Tech in Artificial Intelligence and Machine Learning   CGPA: 7.7/10</i> | Pune, India<br>Jul 2023 – Jun 2027      |
| <b>Tirion International College</b><br><i>Higher Secondary Education (Class XII)   GPA: 3.44</i>                         | Kathmandu, Nepal<br>Jun 2021 – Apr 2023 |

## TECHNICAL SKILLS

|                                   |                                                                            |
|-----------------------------------|----------------------------------------------------------------------------|
| <b>Programming</b>                | Python, SQL, JavaScript                                                    |
| <b>AI / ML</b>                    | Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, LLMs |
| <b>Frameworks &amp; Libraries</b> | FastAPI, NumPy, Pandas, React.js                                           |
| <b>Databases</b>                  | MySQL, MongoDB                                                             |
| <b>Tools</b>                      | Git, GitHub, Linux, DVC, Postman                                           |

## EXPERIENCE

|                                                                                                                                                                                                                                                                          |                                           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------|
| <b>Swayam Shikshan Prayog (SSP)</b><br><i>Service Learning Intern</i>                                                                                                                                                                                                    | Baner, Pune, India<br>Jul 2025 – Oct 2025 |
| <ul style="list-style-type: none"><li>– Processed and analyzed survey datasets using Python, Pandas, and NumPy, supporting data interpretation and visualization.</li><li>– Cleaned, transformed, and organized collected datasets for analysis and reporting.</li></ul> |                                           |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                        |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| <b>CalibraKidney – AI Kidney Screening</b><br><i>Python, Computer Vision, EfficientNet-B2, FastAPI</i>                                                                                                                                                                                                                                                                                                                                                                                          | <a href="#">GitHub</a> |
| <ul style="list-style-type: none"><li>– Built an end-to-end computer vision pipeline for automated urinalysis strip interpretation and G1–G4 kidney health classification.</li><li>– Created and annotated data under varied lighting conditions, benchmarked 19 deep learning models, selected EfficientNet-B2, and evaluated the final model using 5-fold cross-validation.</li><li>– Developed a FastAPI inference backend for integrating the trained model with the application.</li></ul> |                        |
| <b>Manuscript Digitizer – AI Manuscript Restoration</b><br><i>Python, Computer Vision, NLP, Deep Learning</i>                                                                                                                                                                                                                                                                                                                                                                                   | <a href="#">GitHub</a> |
| <ul style="list-style-type: none"><li>– Digitized historical Nepali manuscripts by manually labeling characters and training a computer vision model for character recognition.</li><li>– Applied image preprocessing, OCR, and NLP techniques to reconstruct degraded manuscript images into readable digital text.</li></ul>                                                                                                                                                                  |                        |

## CERTIFICATIONS

- **Deep Learning Specialization** – DeepLearning.AI
- **Generative AI with Large Language Models** – DeepLearning.AI
- **Practical Guide to Python** – Frontend Masters

## ACHIEVEMENTS

- **Winner – SIT AIML Industry Conclave 2026**
- **InterCollege Web Design Competition – VSN IT Club**
